### Service Interruptions:

- None reported.

### Remote/Community Isolations:

- None reported.

# WEATHER OF CONCERN

## Weather of Concern

- A very cold airmass coupled with precipitation will bring snow showers to interior Northern California much of this week. Snow levels will be lowest in Shasta County below 1000 feet with snow levels along the Sierra into the Foothills between 1000 to 3000 feet into Tuesday.

## **Active Weather Warnings, Watches and Advisories by County:**

[http://www.wrh.noaa.gov/sto/brief/wwa\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php)

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

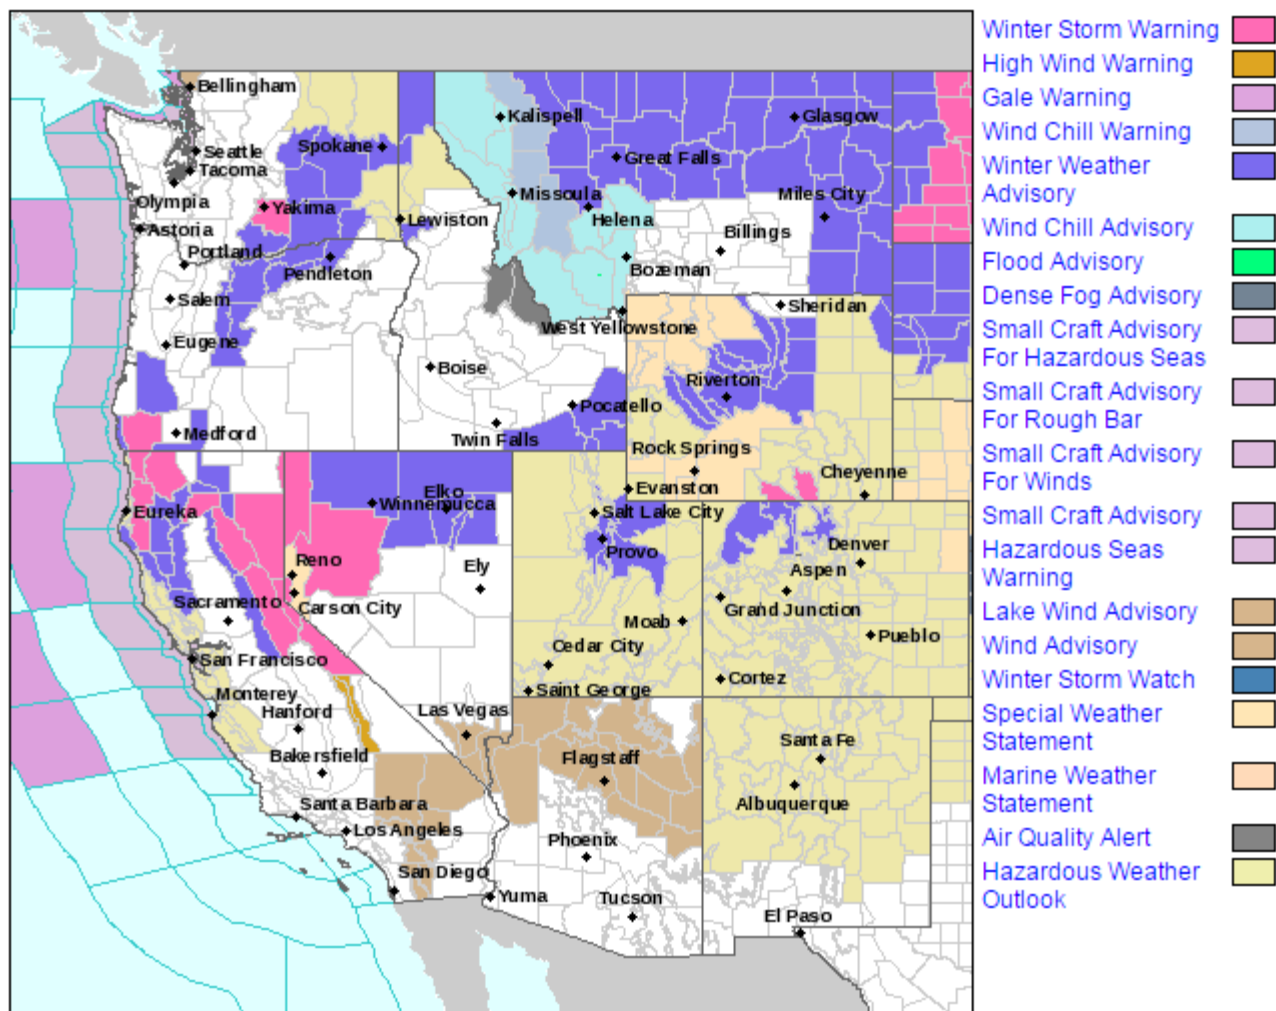

A colder system moves in today into Tuesday with snow levels dropping down into the foothills and northern Sacramento Valley. Wet but milder pattern for mid-week into next weekend. Mostly light showery precipitation across Northern California today with the upper low across the Pacific Northwest and rather limited available moisture. Upslope flow will continue light to moderate snow showers across the west slopes of the northern Sierra Nevada where impacts to travel are expected to be the most pronounced today. Showers may pick up somewhat by this afternoon as a channel vortex rotates across the far northern portion of the state, and even a few thunderstorms cannot be ruled out from the Sacramento area northward.

## **SOUTHERN CALIFORNIA**

A disturbance passing north of the area will bring a slight chance for light showers or drizzle to Los Angeles County from the coast to the western mountain slopes this morning. A series of disturbances will bring rain chances to the Central Coast on Tuesday then spreading south of Point Conception for mid to late this coming week. Starting Saturday, there will be a chance of significant rainfall over the weekend into early the following week.
